

About Dr. Betty Martini

Dr. Betty Martini for over 20 years is the founder of the worldwide volunteer force, Mission Possible World Health International, which is committed to removing aspartame from our food supply. She has an honorary Doctor of Humanities degree for the work she has done. She has 22 years of experience in the medical field. In 1970 Dr. Martini established a model for the nation by creating Physicians on Call, a network of five Emergency Care clinics in Atlanta, Georgia staffed with medical doctors 7 days/24 hours. Services were without cost to the indigent. She speaks frequently on nationwide radio hookups for talk programs throughout the country and the world. The medical text, Aspartame Disease: An Ignored Epidemic, by H. J. Roberts, M.D., is dedicated to her. She can be seen in the aspartame documentary, Sweet Misery: A Poisoned World, cori@sweetremedyradio.com and others.

She is on the Advisory Board of the American Anti-Cancer Institute, and is the in-house aspartame specialist for the National Health Federation. Because of her the "Just Like Sugar" company made a safe sweetener without chemicals, although she has no financial association. Here is the Just Like Sugar story: www.youtube.com/watch?v=MebZ2dIHkkU She has three grown children, two sons and a daughter.
