

About Mark Lerner

Mark Lerner is a previous confidant of the most senior people in the biometrics industry. He supported the use of biometrics until he discovered serious acts of wrongdoing. Mark provided what has been called a “massive” amount of evidence to the federal government regarding the wrongdoing uncovered. A nearly two year federal investigation was conducted without any information being provided to the public or congress. Mark now goes state to state warning citizens and state lawmakers about the dangers of the use of biometrics.

Mark has been to Washington D.C. several times to warn members of congress about the reliance the federal government has on the use of biometrics. Mark is also a co-founder of the [Constitutional Alliance](#)

The Constitutional Alliance's primary mission is to educate citizens about laws and technology applications called for within the laws, which affect citizens by providing the federal government with more power. Since 9/11 Congress has passed many laws and approved the use of many technologies that provide the federal government with both direct and indirect control over We, the people.
