

About Robert Takhtalian

VitaMyr: Natural Products for Healthy Living! Vita-Myr was born from a personal need of its founder, Robert Takhtalian President & C.E.O. ...a natural remedy for Periodontal Disease. VitaMyr offers a superior line of all natural personal care products including Toothpaste & Mouthwash.

Robert Takhtalian at the age of only 44 had periodontal disease so bad that his teeth were loose (the Tooth Fairy was on her way kind of loose) and the only thing his dentist could do was remove the teeth. As you can imagine that didn't go over well with Robert or his wife Yvonne so they spent a year researching and developing natural remedies for periodontal disease. That research resulted in a vitamin, mineral and Herb combination that could be used in a mouthwash. After that year he had no sores in his mouth, no bleeding, no bad breath and his teeth had tightened up in his gums to the point that he could eat anything including chewing gum and even apples.

The fourth key ingredient in the mouthwash and toothpastes is zinc. Zinc also has anti-bacterial properties, inhibits plaque growth, reduces wound healing time and eliminates VSC's (volatile sulfur compounds) which is a key factor in causing bad breath.
