

Ron Salley, creator of Miracle Skin Creams & Lotions

Salley Enterprises makes some of the best creams around. They have, according to herbalists, done the impossible, by extracting the essences of herbs using a cold process.

Like most innovators, Ron doesn't know the meaning of the word impossible. He knew that extracting the good stuff from herbs traditionally used heat. He was told that it was impossible to get the good stuff out without using heat. After 9 years of experimenting, Ron did the impossible.

By 1977 Ron Salley produced his first moisturizer. His aim was to create a perfectly natural, perfectly harmless, safe, and effective moisturizer. He refused to use any petrochemicals, emulsifying additives, or chemicals that no one can pronounce. In other words, everything he uses is edible (though you will probably not like the taste). If it shouldn't go *in* your body, it shouldn't go *on* your body.

By the end of 1981, he had perfected an all-natural skin moisturizer that had all the healing properties of the herbs from which he'd extracted the phytochemicals with his own, unique process.
