Voter Fraud White Paper – October 31, 2020 - Addendum

Introduction to October 31, 2020 Addendum

The 2020 election has taken on completely new dimensions in voter fraud and deception. It is no doubt the most important election in the history of the United States of America. Not only are there major differences in almost all the platforms (something that was not an issue previously in the one party system where Republicans and Democrats had sold out the USA long ago to the highest bidder). The sleeping American public has awoken. The voter fraud issues of the past have been multiplied 10 fold if not more in the 2020 election. Mail in voter fraud is the largest segment of fraud. The news media is owned by the communist agenda funded by China, independent chaos sponsors like Michael Bloomberg of New York or George Soros, Big Pharma and Medical Mafia (the list goes on) and last but certainly not least the CIA (the police force of the world bank with headquarters in the USA which owns and controls the news media and most importantly Social Media platforms). Never before has there been such a large number of outside influences in an election with such a large number of agendas, however, ultimately, they all lead back to the same source of globalist control.

My previous study published first in October 2016 (prior to the 2016 presidential election) and then updated in January 2017 (my mathematical regression analysis after the election using actual voter numbers to show massive voter fraud in favor of Hillary Clinton) and again in 2018 at the mid-term federal elections. The current update is being released just prior to the election of 2020 and will be updated with actual voter numbers after the election.

The Prior Voter Cheating Fraud Paper – Top 11 Ways to Cheat

The original 2016 White Paper with its 2019 short addition should be read before reading this addendum. It focused on the 2016 USA Presidential Election with the conclusion that Hillary Clinton gained approximately 17 million illegal votes by the methods of voter fraud and also the additional entry released on May 23, 2019 concentrated on the 2018 midterm election. These must be read before understanding this addendum

Vote Harvesting

The Vote harvesting takes on many forms but has increased 10 fold over the 2016 and 2018 election levels. It amounts to "Get out and Vote" campaigns which disguise a door to door and other forms of identifying voters who have either moved away or who will not vote. Once these are identified the voter fraud team goes into action by falsifying the process of mail in or

early voting. There are numerous methods of voter harvesting and have been implemented by the Democratic party to create “Democratic Strong Hold” regions primarily associated with 10 major metropolitan areas as outlined in the prior mathematical studies.

Young People Educated in Liberal Communist Propaganda Schools

Teacher Union & Education Controlled by Democrats – Controlled Votes – Youth

The education system has long since been infiltrated by the Democratic party via the teacher’s unions but also in the text book and curriculum indoctrination based on national efforts such as “Common Core” and “No Child Left Behind”. One might say that these were implemented by Republicans BUT that was in the days when there was a single party (both parties ran the same agenda). The atheist communist agenda was central to all of these programs including social studies, political indoctrination and last but not least was science and oddly enough mathematics. Students were taught a confusing set of rules with the “New Math” and did not learn nor were they trained in critical thinking. They were taught to believe a series of dogmatic “facts” which they then entered the “real world”. The result of this faulty educational system resulted in youth being ashamed of themselves and accepting the twisted logic of the communist agenda with buzz words like “diversity” and “sustainability” and the list goes on. The concepts behind these terms were 1) the destruction of the family and 2) removal of a divine creator with human beings being different from animals because they have an inherent spirit and soul. The concept of inalienable rights was destroyed.

The leaders of the One World Government knew that they were a generation away from achieving their goal of chipped society with public acceptance. All they had to do was create the agenda in the school systems with control through the teacher’s unions and text book companies (along with a healthy dose of the evening “news”) and then was just a matter of awaiting the baby boomer post WWII generation to get old and die off. That is where we are today in 2020.

Weather – Local Terrorism & Riots – Power Outages – NASA & NOAA false flags

Many Methods to Prevent People from Voting

There are dozens of factors that have played out over the past decades and especially the past 4 years. This has seen a massive crescendo in the past months. The entire point of the literally thousands of cover stories was to create chaos and confusion. With a confused public of real life issues being replaced with created Fake News issues, the effect on the election was to take people down a path laid out in the Communist Manifesto. Behind the scenes people were burned out of the houses in mass, starved and had their businesses closed with riots in the street being promoted by the insane liberal left agendas. This is now resulting in massive food shortages, very high prices for essential commodities and majority of purchases being made by the public from the Amazon monopoly.

“Corona Virus” – CDC – WHO – Bill Gates - and the Election

The release of the “COVID19 Novel Virus” was a planned event to disrupt the 2020 election and bring in the one world medical control of all governments. This is a complex story but the timing had been set decades ago.

The Great Debt Reset – Taking down the World Economy

The Great Debt Reset was also planned decades ago to bail out the failed world economy after the planned demic of Covid19. Like many planned events before such as 911, the Fukushima nuclear disaster and many other planned events. The chess board of the world bankers and their CIA police force was executed. The public is aware of this, but massive cheating in the 2020 election will help bring about the demise of the free world as the second and subsequent “Lock Downs” are being implemented world wide at precisely this time.

Mail in Voter Fraud – Promoted then Backfires on Promoters

The Democratic Party believed that mail in voting was their savior in collecting massive amounts of illegal votes so they encouraged voters to vote early. They then realized that this method of voting was going to be challenged and many of the real mail in votes may not count as they would be mixed into millions of illegal vote counts. Just weeks before the election they realized that the honest people of the USA were descending on the voting precincts to observe and prevent voter fraud. Organizations such as Judicial Watch had successfully gotten court orders for large areas like Los Angeles and other large cities to expunge their 10 year old out of date voter rolls. The result is that the Democratic Party could no longer depend on this cheating method to overpower the real votes for the large base of Trump Support. They panicked and then told their voters to vote on election day, however it was too late to reverse the massive number of Democrats that planned to vote early. They are panicking even more as they now are seeing that their early voter turn out was weak and are heading into the November 3rd election date with many people already having voted and with low overall numbers. They are now depending on swing states in which they hope to stuff the ballot box after the election (reminiscent of the Florida disaster of the 2018 mid term election).

Polls vs Numbers at Rallies

The polls are turning out to be exactly as with the 2016 election where they are predicting a massive win for Democratic Vice President Biden. The rallies showed a stark difference with Trump hosting rallies with nearly 100% return on invitations with 25,000 to many more filling venues. People were generally not wearing masks and certainly not social distancing. The Fake News media actually had to stop pointing this out as people realized that the corona virus scare had ended and people were simply ignoring the “Case Surge” propaganda of the left wing owned CIA media. In contrast the Biden Harris campaigns sometimes drew as few as 10 people. This is so bizarre that it stands as one of the most lop sided elections in history.

News Media - Over the Top - Who Owns the “News”

The News media continues to fill their air waves with created news with the same talking points being repeated on show after show. Ratings of the cable news shows are clear that the public has long since turned this off. The end result is that once again the election rests on the founding fathers' vision of the electoral college to overcome massive voter fraud.

The Electoral College

The Electoral College ... why it is under attack. The answer is simple. Without it we would instantly become a third world country where the elite and powerful maintain with the public being surfs. Places like this are Canada, Mexico and hundreds of other countries. Proponents of eliminating the Electoral College state that the USA is behind the times and all these other countries are exemplary models of national pride and honesty. All of the countries without an Electoral College system (all countries) have a reigning elite with third world status because no one can get ahead in a country that has long had a single few families controlling everything.

The electoral college's primary purpose is to prevent two issues. The first is stuffing the ballot box in a few high population locations to continually swing the elections to a single political party (massive voter fraud in a few locations still happens in the USA but the electoral college prevents that). The second is to prevent large population states from dominating the elections by giving identical subdivisions of population (same divisions as the House of Representatives).

To fully understand the purpose of the Electoral College you have to understand the structure of the US Congress in its two parts. The House of Representatives (435 members) are elected from a population of Total Population / 435 (total population divided by 435). That means that each Representative represents an equal number of people. The Electoral College follows this same division of the country. What opponents to the electoral college want is a general election stating that this is the only fair method since “every vote counts equally”. Only a complete moron would say this, knowing full well that the end result would be controlled by the political party in power in New York, Los Angeles, Chicago, Miami and literally 10 major cities that make up the majority of the population. That would be your future.

Take Canada for example. A sprawling huge country with three large population centers in the east with few resources and the vastness of a large part of the North American Continent with low population and vast natural resources to the west. The eastern populations control the lives of those to the west to the point that the western provinces are moving to become states of the United States of America. The union cannot work with a few population centers controlling the rest. IT DOES NOT WORK.

Without a division of votes like this, there would be no point in people in states with low populations from voting since all elections would be decided by a few population centers, which by the way are controlled by one party and have been for literally hundreds of years. The opponents also state that the EC creates “swing states” that will decide the elections. That

is not really true. What happens is that in spite of massive ballot box stuffing in certain high population areas which always result in Democratic "Strong Holds", they do not affect the national presidential election precisely because of the division of votes. No matter how much cheating occurs in the 10 major Democratic "Strong Hold" cities, it does not affect the national election. The fact that small population states are important is a statement that the Electoral College is working as planned. Many people in the USA are swayed by the bogus arguments of EC opponents because of poor science and math education in the USA.

Foreign countries that do not have an electoral college have the issue of what we call the "banana republic". A single party gains power by stuffing the ballot box and the winner literally takes all. The population then squalors in the dirt for decades as a few elite ruling class families take all power and wealth from the country. They pass laws and form agencies to which are appointed their friends and family. Life is good. So, the ruling class wants this form of "government". They then get support from foreign governments and issues like foreign aid are divided amongst the leaders, never getting to the people it was sent to help.

To help understand the EC, let us take a hypothetical example of an ideal country. It has 100 states with exactly the same resources, population and sizes. We will call this country the United Square States of Prosperica or USSP for short. They set in a giant square area and as noted have exactly the same resources. The population of USSP is exactly 100 million people. So there are 1 million people in each of the 100 states. All people own a piece of land that is perfectly equal to that of everyone else. When someone dies another person is born to take their place so the exact population is always maintained. Now when it comes to voting there is no need for an electoral college since all people have the same influence in the election. Now imagine that something changes and 60 of the states have massive population reductions, leaving them with smaller populations. Someone proposes the Electoral College system so that each person's vote counts the same as those in large population states. The large population states protest as they see this as a way for them to gain and maintain control. NOW you may see the real situation in the USA, which is far more complex, but has the same issue of making sure everyone's votes count equally.

The issue with the Electoral College is simple. Those who want a few families to control the elections and everything else want to abolish the EC. Those who want free elections and those who created the EC system know that without it the USA will become another third world banana republic. The exact reason given for its abolition (equality of votes) is actually the exact reason to keep it forever in place. Without it the USA will cease to exist, since the USA government has been thoroughly infiltrated by criminal mob bosses with shiny suits and slick political slogans (they are in both "parties" by the way). Government is the perfect place for the scam artist liar cheat that does not want to work but sees the ability to take a piece of everyone and put the hard labors of all into a kitty for themselves and their buddies. Eliminating the Electoral College will guarantee that the crooks will gain control and at that point will never relinquish it as more and more opportunists flock to their beckon call.
